SUMMARY

Senior Frontend Software Engineer with 7+ years of experience building web and mobile applications with JavaScript, TypeScript, React, Angular, and Next.js.

Delivered a real-time trading platform prototype in under three weeks and reduced initial React mount time by 97% through systematic profiling, component-level optimization, and virtualized interfaces.

Experience includes UI architecture, design-system collaboration, accessibility standards, state management, automated testing, CI/CD, legacy modernization, and Ionic mobile applications.

EXPERIENCE

GasHub, Full Stack Engineer

Jun 2025 – Present

- Delivered a real-time natural gas trading platform prototype in under **3 weeks** using **React** and **Supabase** for market validation.
- Accelerated Product and Engineering alignment by creating a shared workflow for **Pencil.dev** design-system artifacts and frontend implementation.
- Reduced initial React mount time by **97%** and data-load render time by **94%** through **React Profiler** analysis, memoization, Hooks-based refactors, and CSS-only interaction states.
- Built a data-rich trading interface with five independently filtered views, infinite scroll, and row virtualization using **TanStack Virtual**.
- Reduced Products API warm latency by **95.7%** through request profiling, query parallelization, transaction consolidation, and **PostgreSQL** optimization.
- Established automated quality coverage with **Testing Library** unit tests and **Playwright** end-to-end tests.

MyTime, Frontend Software Engineer

Apr 2022 – Mar 2025

- Modernized a business-critical payment system from **AngularJS** and CoffeeScript to **Angular** and **TypeScript** without disrupting operations.
- Coordinated multi-step checkout and payment flows with **NgRx** feature stores, actions, and effects, creating predictable state boundaries across POS modules.
- Reduced regression risk in core checkout flows by establishing high test coverage with **Jest** and **Testing Library**.
- Improved usability for visually impaired users by implementing **W3C accessibility** standards across customer workflows.

Twenty20 Solutions, Frontend Software Engineer

Jan 2022 – Mar 2022

- Architected a modular browser-based desktop environment from scratch with **Angular**, **SOLID**, and Clean Architecture principles.
- Established automated verification with **Jest**, **GitHub Actions** CI/CD quality gates, linters, and shared code-quality standards.

GreenAnt, Frontend Software Engineer

Jan 2020 – Dec 2021

- Completed a zero-downtime **AngularJS-to-Angular** migration using **Webpack** dual-environment bundling, allowing legacy and modern code to coexist during incremental delivery.
- Built reusable UI components and reactive data visualization for an electric energy dashboard using **Angular** and **RxJS**.

- Launched a hybrid mobile invoice-payment and data-monitoring application using **Ionic** and **CapacitorJS** for Android and iOS.
- Automated deployments with **GitLab CI** while decoupling PDF generation into an **AWS Lambda** microservice.

Universidade de Brasília, **Frontend Software Developer**

Aug 2018 – Aug 2020

- Developed a mobile-first government data dashboard using **Angular** and **Next.js**, improving public access to complex information through focused UX design.

Gera Energia Brasil, **Frontend Software Engineer**

Feb 2019 – Dec 2019

- Built data-intensive energy management dashboards with **Angular** and **PrimeNG**.
- Set up automated testing with **Jasmine** and a CI/CD pipeline for continuous delivery.

Finatec, **Software Developer**

May 2017 – Jun 2018

- Developed frontend features in **Angular** and contributed to Java microservices containerised with **Docker**.

EDUCATION

B.S. in Computer Science

Universidade de Brasília

2014 – 2022

SKILLS

Languages: TypeScript, JavaScript, CSS

Frontend: React.js, Next.js, Angular, AngularJS, Ionic, CapacitorJS, NgRx, Tailwind CSS, TanStack Virtual

Backend: Node.js, NestJS, Deno, Supabase, Drizzle ORM, Zod

Databases: PostgreSQL, pgTAP

Testing: Jest, Testing Library, Playwright, Jasmine, React Profiler

DevOps: Git, Vite, Webpack, GitHub Actions, GitLab CI, CI/CD, Docker, AWS Lambda

Architecture: UI architecture, design-system workflows, reusable components, Clean Architecture, SOLID, state management, W3C accessibility standards
