## SUMMARY

Frontend-focused Full Stack Engineer with **8+ years of Frontend experience**, including **2 years with React**, and recent Backend delivery in natural gas trading.

Delivered a market-validation prototype in under **3 weeks** and reduced API warm latency by **95.7%** through database and service optimization.

Background in energy analytics and legacy modernization, with hands-on LLM API integration through a personal **Python RAG application**.

## EXPERIENCE

*GasHub*, **Full Stack Engineer**

*Jun 2025 – Present*

- Delivered a real-time natural gas sales prototype in under **3 weeks** using **React** and **Supabase**, enabling validation of core buyer-seller workflows.
- Reduced product-listing API warm latency by **95.7%** through query parallelization, transaction consolidation, and **PostgreSQL** profiling.
- Enabled atomic trading operations with **Drizzle ORM**, **Deno**, **Zod** validation, and a layered architecture using repositories, use cases, and **Unit of Work**.
- Reduced marketplace startup code through shell-first rendering, intent-aware **React** preloading, and **Vite** code splitting, shrinking the initial JavaScript entry by **78.2%** (**75.9% gzip**).
- Established automated quality coverage with **Testing Library** unit tests and **Playwright** end-to-end tests.

*MyTime*, **Frontend Software Engineer**

*Apr 2022 – Mar 2025*

- Modernized a business-critical payment system from **AngularJS/CoffeeScript** to **Angular/TypeScript** without disrupting operations, supported by **Jest** and **Testing Library** tests.
- Coordinated multi-step checkout and payment flows with **NgRx**, isolating state by POS module for predictable testing and maintenance.

*Twenty20 Solutions*, **Frontend Software Engineer**

*Jan 2022 – Mar 2022*

- Architected a modular browser-based desktop environment using **Angular**, **SOLID**, and **Clean Architecture**, with **Jest** and **GitHub Actions** quality gates.

*GreenAnt*, **Frontend Software Engineer**

*Jan 2020 – Dec 2021*

- Modernized a production electric-energy dashboard through a zero-downtime **AngularJS-to-Angular** migration using **Webpack** dual-environment bundling.

*Universidade de Brasília*, **Frontend Software Developer**

*Aug 2018 – Aug 2020*

- Developed a mobile-first government-data dashboard using **Angular** and **Next.js**, improving public access to information.

*Gera Energia Brasil*, **Frontend Software Engineer**

*Feb 2019 – Dec 2019*

- Built enterprise energy-consumption dashboards with **Angular** and **PrimeNG**, enabling clients to monitor energy usage and costs.

*Finatec*, **Software Developer**

*May 2017 – Jun 2018*

- Built an **Angular** SPA for internal military-administration data, applying UX practices for usability.

*SEC Filings RAG — Personal Course Project*, **Python RAG Application**

*AI Specialization Course*

- Built a document-grounded question-answering application in **Python**, integrating **Groq's LLM API** with retrieved SEC-filings context and returning answers with retrieval metadata.
- Implemented **Qdrant** hybrid retrieval using dense embeddings, **BM25**, **Reciprocal Rank Fusion**, and **ColBERT** reranking.

## EDUCATION

**B.S. in Computer Science**

*Universidade de Brasília*

2014 – 2022

## SKILLS

**Languages:** TypeScript, JavaScript; Python (personal projects)

**Frontend:** React, Angular, Next.js, NgRx, Tailwind CSS, TanStack Virtual

**Backend:** Node.js, NestJS, Deno, Supabase, Drizzle ORM, Zod; Groq API (personal project)

**Databases:** PostgreSQL; Qdrant (personal project)

**Testing:** Jest, Testing Library, Playwright, pgTAP

**DevOps:** GitHub Actions, GitLab CI, AWS Lambda, Amazon S3, Docker

**Architecture:** Layered architecture, Unit of Work, SOLID, Clean Architecture
