SUMMARY

Senior Frontend Software Engineer with over **7 years** of experience building scalable web and mobile products with **React**, **Next.js**, **Angular**, and **TypeScript**.

Delivered a real-time trading platform prototype in under **3 weeks**, improved frontend load performance by **97%** through profiling-led optimisation, and modernised legacy applications through zero-downtime migrations.

Strong fit for remote product teams that value accessibility, responsive UX, clean architecture, automated testing, and autonomous ownership.

EXPERIENCE

GasHub, Full Stack Engineer

Jun 2025 – Present

- Delivered a real-time trading platform prototype in under **3 weeks** using **React**, enabling rapid product validation in a fast-moving startup environment.
- Fixed a UX-breaking rendering bottleneck on the core trading interface, achieving **97% faster** initial loads through **React 18 Profiler**-driven optimisation.
- Architected a high-volume product discovery experience with virtualized lists, infinite scroll, and independent filtering, keeping the UI responsive as data volume grew.
- Enabled confident releases by establishing **Testing Library** unit coverage and **Playwright** end-to-end tests across critical user flows.

MyTime, Frontend Software Engineer

Apr 2022 – Mar 2025

- Modernized a business-critical payment experience by migrating **AngularJS/CoffeeScript** to **Angular/TypeScript**, supporting a successful platform re-launch without disrupting operations.
- Rebuilt core POS flows to improve usability and long-term maintainability in a global scheduling and payments platform.
- Implemented **W3C accessibility** standards across key screens, expanding usability for visually impaired users.
- Reduced regression risk on checkout flows by adding high-coverage automated tests with **Jest** and **Testing Library**.

Twenty20 Solutions, Frontend Software Engineer

Jan 2022 – Mar 2022

- Architected a modular browser-based desktop environment in **Angular/TypeScript**, translating complex product requirements into a scalable frontend foundation.
- Introduced **Jest** testing and **GitHub Actions** CI/CD, establishing the first automated quality gates for the project.

GreenAnt, Frontend Software Engineer

Jan 2020 – Dec 2021

- Led a zero-downtime **AngularJS** → **Angular** migration using dual-environment **Webpack** bundling, keeping production stable throughout the transition.
- Built reusable dashboard components for real-time energy analytics, improving data visibility for enterprise clients.
- Launched a mobile app with **Ionic**, expanding access to invoice payment and energy monitoring on the go.

Universidade de Brasília, Frontend Software Developer

Aug 2018 – Aug 2020

- Developed a mobile-first government data dashboard using **Angular** and **Next.js**, improving data accessibility for public-sector users.

Gera Energia Brasil, **Frontend Software Engineer**

Feb 2019 – Dec 2019

- Built data-intensive energy management dashboards with **Angular** and **PrimeNG**.
- Set up automated testing with **Jasmine** and a CI/CD pipeline for continuous delivery.

Finatec, **Software Developer**

May 2017 – Jun 2018

- Developed frontend features in **Angular** and contributed to Java microservices containerised with **Docker**.

EDUCATION

B.S. in Computer Science

Universidade de Brasília

2014 – 2022

SKILLS

Languages: TypeScript, JavaScript, English

Frontend: React.js, Next.js, Angular, Ionic, Tailwind CSS, NgRx, Angular Material, TanStack Virtual, W3C Accessibility

Testing: Jest, Testing Library, Playwright, Jasmine

DevOps: GitHub Actions, GitLab CI, AWS Lambda, Docker

Architecture: Frontend architecture, responsive UI, performance optimization, component design, CI/CD
