SUMMARY

Senior Frontend Software Engineer with over **7 years** of experience building products with **React**, **Next.js**, **Angular**, and **TypeScript**.

Most of my recent work has focused on shipping complex frontend features quickly, improving performance, and making legacy systems easier to maintain.

I work best in product teams that care about accessibility, responsive UX, clean code, and engineers who can own problems end to end.

EXPERIENCE

GasHub, **Full Stack Engineer**

Jun 2025 – Present

- Built a real-time trading platform prototype in under **3 weeks** with **React**, which gave the team something solid to use for early product validation.
- Improved the performance of the main trading screen after profiling render bottlenecks, cutting initial load time by **97%**.
- Designed a product browsing experience with virtualized lists, infinite scroll, and independent filters so the UI stayed responsive as the dataset grew.
- Added **Testing Library** unit tests and **Playwright** end-to-end coverage for key user flows, making releases safer.

MyTime, **Frontend Software Engineer**

Apr 2022 – Mar 2025

- Migrated a business-critical payment flow from **AngularJS/CoffeeScript** to **Angular/TypeScript**, helping the company relaunch the platform without interrupting day-to-day operations.
- Reworked core POS flows to make them easier to use and easier for the team to maintain over time.
- Added support for **W3C accessibility** standards across key screens so visually impaired users could use the product more reliably.
- Increased confidence in checkout changes by adding automated tests with **Jest** and **Testing Library**.

Twenty20 Solutions, **Frontend Software Engineer**

Jan 2022 – Mar 2022

- Designed a modular browser-based desktop environment in **Angular/TypeScript**, giving the project a frontend foundation that could scale as new features were added.
- Set up **Jest** and **GitHub Actions** CI/CD to give the team its first automated quality checks.

GreenAnt, **Frontend Software Engineer**

Jan 2020 – Dec 2021

- Led an **AngularJS** → **Angular** migration with no downtime by running both environments side by side with **Webpack** during the transition.
- Built reusable dashboard components for real-time energy analytics, giving enterprise clients clearer visibility into their data.
- Released a mobile app with **Ionic** so customers could pay invoices and monitor energy usage from their phones.

Universidade de Brasília, **Frontend Software Developer**

Aug 2018 – Aug 2020

- Developed a mobile-first government data dashboard using **Angular** and **Next.js**, improving data accessibility for public-sector users.

Gera Energia Brasil, **Frontend Software Engineer**

Feb 2019 – Dec 2019

- Built data-intensive energy management dashboards with **Angular** and **PrimeNG**.
- Set up automated testing with **Jasmine** and a CI/CD pipeline for continuous delivery.

Finatec, **Software Developer**

May 2017 – Jun 2018

- Developed frontend features in **Angular** and contributed to Java microservices containerised with **Docker**.

EDUCATION

B.S. in Computer Science

Universidade de Brasília

2014 – 2022

SKILLS

Languages: TypeScript, JavaScript, English

Frontend: React.js, Next.js, Angular, Ionic, Tailwind CSS, NgRx, Angular Material, TanStack Virtual, W3C Accessibility

Testing: Jest, Testing Library, Playwright, Jasmine

DevOps: GitHub Actions, GitLab CI, AWS Lambda, Docker

Architecture: Frontend architecture, responsive UI, performance optimization, component design, CI/CD
