SUMMARY

Frontend Software Engineer with over **7 years** of experience building scalable web applications with **Angular** and **TypeScript**.

Led multiple **AngularJS** → **Angular** migrations in production environments, implemented complex state management with **NgRx**, and established testing cultures using **Jest** and **Testing Library**.

Passionate about clean, maintainable code, strong UX principles, and frontend architectures built for the long term.

EXPERIENCE

GasHub, Full Stack Engineer

Jun 2025 – Present

- Conducted three rounds of **React Profiler** analysis on the trading page, reducing initial mount time from **59.1 ms** → **1.8 ms (–97%)** and per-block commits from **13–31 ms** → **under 2 ms (–94%)**.
- Reduced Products API latency from **3,010 ms** → **132 ms (–95.7%)** via query parallelization, merged RLS transactions, and EXPLAIN ANALYZE profiling.
- Built a data-intensive product browsing page with 5 independently-filtered blocks, infinite scroll, and **TanStack Virtual** row virtualization to handle large datasets without performance degradation.

MyTime, Frontend Software Engineer

Apr 2022 – Mar 2025

- Migrated a business-critical payment system from **AngularJS/CoffeeScript** to **Angular/TypeScript**, enabling continued product evolution without disrupting live operations.
- Rebuilt core POS modules to improve user experience and long-term maintainability, significantly reducing future change effort across the application.
- Established automated test coverage with **Jest** and **Testing Library**, reducing regression risk on critical checkout and payment flows.
- Implemented **W3C accessibility** standards across key user-facing screens, making the product fully operable for visually impaired users.

Twenty20 Solutions, Frontend Software Engineer

Jan 2022 – Mar 2022

- Architected a browser-based desktop environment using **Angular/TypeScript**, applying **SOLID** principles and Clean Architecture to deliver a modular, maintainable codebase.
- Introduced **Jest** for unit testing and **GitHub Actions** CI/CD pipelines, establishing automated quality gates from the project's start.
- Configured linters and enforced code quality standards, ensuring consistency across a growing team.

GreenAnt, Frontend Software Engineer

Jan 2020 – Dec 2021

- Developed reusable dashboard components for real-time energy analytics in **Angular**, improving data visibility for enterprise clients.
- Led a zero-downtime **AngularJS** → **Angular** migration using **Webpack** dual-environment bundling, keeping production stable throughout the transition.
- Launched a mobile application with **Ionic** for invoice payment and data monitoring, reusing Angular component logic and adapting UX for mobile-first interactions.

Universidade de Brasília, Frontend Software Developer

Aug 2018 – Aug 2020

- Developed a mobile-first government data dashboard using **Angular** and **Next.js**, improving data accessibility for public-sector users.

Gera Energia Brasil, **Frontend Software Engineer**

Feb 2019 – Dec 2019

- Built data-intensive energy management dashboards with **Angular** and **PrimeNG**.
- Set up automated testing with **Jasmine** and a CI/CD pipeline for continuous delivery.

Finatec, **Software Developer**

May 2017 – Jun 2018

- Developed frontend features in **Angular** and contributed to Java microservices containerised with **Docker**.

EDUCATION

B.S. in Computer Science

Universidade de Brasília

2014 – 2022

SKILLS

Languages: TypeScript, JavaScript, English

Frontend: Angular, NgRx, Angular Material, TypeScript, RxJS, Ionic, CapacitorJS, Tailwind CSS, W3C Accessibility

Backend: Node.js, NestJS, REST APIs, Supabase

Databases: PostgreSQL

Testing: Jest, Testing Library, Jasmine, Playwright

DevOps: GitHub Actions, GitLab CI, AWS Lambda, Docker

Architecture: Component-driven UI, state management, AngularJS → Angular migration, Clean Architecture, CI/CD
