SUMMARY

Software Engineer with 7+ years of experience building web and mobile applications, including recent full-stack product delivery with TypeScript, React, Angular, and Node.js.

Delivered a real-time sales-platform prototype in under three weeks, cut API warm latency by 95.7%, and modernized a business-critical payment system without disrupting operations.

AWS experience includes a professional Lambda service and a separately configured personal web-app deployment using EC2, CodeBuild, CodePipeline, S3, and CloudFront.

EXPERIENCE

GasHub, **Full Stack Engineer**

Jun 2025 – Present

- Delivered a real-time natural gas sales-platform prototype in under **3 weeks** using **React** and AI agents, enabling market validation of core buyer-seller workflows.
- Resolved a major Products API bottleneck through request profiling and query parallelization, reducing warm response latency by **95.7%** to approximately **132 ms**.
- Enabled atomic multi-step business operations by migrating data access to **Drizzle ORM** on **Deno** and introducing validation, use-case, repository, and Unit of Work layers.
- Built a virtualized sales interface with five independently filtered views and infinite scroll; profiler-led refactors reduced initial mount time by **97%** and data-load commits by **94%**.

MyTime, **Frontend Software Engineer**

Apr 2022 – Mar 2025

- Modernized a business-critical payment system from **AngularJS** and CoffeeScript to **Angular** and **TypeScript** without interrupting operations, adding automated **Jest** and **Testing Library** coverage.
- Coordinated multi-step checkout and payment flows with **NgRx**, isolating state by POS module for predictable testing and maintenance.

Twenty20 Solutions, **Frontend Software Engineer**

Jan 2022 – Mar 2022

- Architected a modular browser-based desktop environment with independently developed mini-applications using **SOLID** principles and Clean Architecture.

GreenAnt, **Frontend Software Engineer**

Jan 2020 – Dec 2021

- Completed a zero-downtime **AngularJS to Angular** migration for an electric-energy dashboard using **Webpack** dual-environment bundling.
- Decoupled invoice PDF generation into an **AWS Lambda** microservice and automated deployments with **GitLab CI**.

Universidade de Brasília, **Frontend Software Developer**

Aug 2018 – Aug 2020

- Built a mobile-first **Angular** and **Next.js** dashboard for public access to government data.

Gera Energia Brasil, **Frontend Software Engineer**

Feb 2019 – Dec 2019

- Built **Angular** and **PrimeNG** dashboards for enterprise energy-consumption analytics, helping clients monitor and reduce energy costs.
- Set up automated testing with **Jasmine** and a CI/CD pipeline for continuous delivery.

Finatec, **Software Developer**
May 2017 – Jun 2018

- Built an **Angular** SPA for internal military-administration data and contributed to **Java EE** microservices containerized with **Docker**.

EDUCATION

B.S. in Computer Science
Universidade de Brasília
2014 – 2022

SKILLS

Languages: TypeScript, JavaScript

Frontend: Angular, AngularJS, React.js, NgRx, Ionic, Next.js, Tailwind CSS, TanStack Virtual

Backend: Node.js, NestJS, Deno, Supabase, Drizzle ORM, Zod

Databases: PostgreSQL

Testing: Jest, Testing Library, Playwright, Jasmine, pgTAP

DevOps: AWS Lambda, EC2, S3, CloudFront, CodeBuild, CodePipeline, GitHub Actions, GitLab CI, Docker

Architecture: Clean Architecture, SOLID, Unit of Work, layered architecture
