## SUMMARY

---

Full Stack TypeScript Engineer with 6+ years of experience delivering end-to-end features across React/Next.js frontends and Node.js backends.

Shipped a real-time natural gas trading platform prototype for matching sellers and buyers in under 3 weeks, cut API latency by 95.7%, and reduced React mount time by 97% through profiling and architectural refactors.

Thrive in product-focused, fast-moving teams where engineers own features from database to UI.

## EXPERIENCE

---

### GasHub, Full Stack Engineer

*Jun 2025 – Present*

- Delivered a real-time natural gas trading platform prototype for matching sellers and buyers in under **3 weeks**, enabling market validation before full-scale development.
- Integrated the **React** frontend with **Node.js** and database services, taking features from trading workflows through backend architecture.
- Improved responsiveness in the live trading workflow by reducing API latency **95.7%** through query and architecture improvements.
- Reduced initial React mount time by **97%** through systematic profiling and targeted rendering optimizations.
- Built the trading interface with five independently filtered views, infinite scroll, and **TanStack Virtual** for growing datasets.
- Established automated coverage from scratch with **Testing Library** unit tests and **Playwright** end-to-end tests.

### MyTime, Frontend Software Engineer

*Apr 2022 – Mar 2025*

- Migrated a legacy payment system in a global scheduling and POS platform from **AngularJS**/CoffeeScript to **Angular**/TypeScript, enabling a successful platform re-launch.
- Achieved high test coverage via **Jest** and **Testing Library**, catching regressions before they reached production on core checkout flows.
- Implemented **W3C accessibility** compliance across key user-facing screens.

### Twenty20 Solutions, Frontend Software Engineer

*Jan 2022 – Mar 2022*

- Architected a browser-based desktop environment with modular mini-applications using **SOLID** principles and Clean Architecture in **TypeScript**.
- Introduced **Jest** testing and **GitHub Actions** CI/CD pipeline as the first quality infrastructure in the project.

### GreenAnt, Frontend Software Engineer

*Jan 2020 – Dec 2021*

- Executed a zero-downtime **AngularJS to Angular** migration for an electric-energy dashboard using **Webpack** dual-environment bundling.
- Built a serverless PDF generation microservice for invoice workflows on **AWS Lambda** (Node.js).
- Shipped a mobile app for invoice payment and energy-data monitoring using **Ionic** and **CapacitorJS** on Android and iOS.

### Universidade de Brasília, Frontend Software Developer

*Aug 2018 – Aug 2020*

- Developed a mobile-first government data dashboard using **Angular** and **Next.js**, improving public access to government information.

### *Gera Energia Brasil*, **Frontend Software Engineer**

*Feb 2019 – Dec 2019*

- Built **Angular** and **PrimeNG** dashboards for enterprise energy-consumption analytics, helping clients monitor and reduce energy costs.
- Set up automated testing with **Jasmine** and a CI/CD pipeline for continuous delivery.

### *Finatec*, **Software Developer**

*May 2017 – Jun 2018*

- Built an **Angular** SPA for internal military-administration data and contributed to **Java EE** microservices containerized with **Docker**.

## EDUCATION

---

### **B.S. in Computer Science**

*Universidade de Brasília*

2014 – 2022

## SKILLS

---

**Languages:** TypeScript, JavaScript

**Frontend:** React.js, Next.js, Angular, Ionic, TanStack Virtual, Tailwind CSS, NgRx, Angular Material

**Backend:** Node.js, NestJS, Deno, Drizzle ORM, Zod, Supabase

**Databases:** PostgreSQL, pgTAP

**Testing:** Jest, Testing Library, Playwright, Jasmine

**DevOps:** GitHub Actions, GitLab CI, AWS Lambda, Amazon S3, Docker
